

THE 21 OF COHERENCE

Foundational source set for c3 actors

Authority	system foundational source
Version	v1 2026-04-01 operator op044
Native stack	Codex -> Field -> Measures -> Chazz

Constraints define what must remain true. Agreements define how those truths are lived.
Resolutions show what coherence becomes when it is maintained.

FOUNDATIONAL SOURCE

Purpose

Present the 7 Constraints, 7 Agreements, and 7 Resolutions of Coherence as a shared foundation for trustworthy participation.

This source is intended for use across the c3 field by Named Individuals, Institutions in Service, and AI operating within defined roles.

Together, these 21 principles support clear relation, accountable action, and durable continuity across people, systems, and structures.

It offers a practical coherence framework for entry, collaboration, and recognition within the field.

Coherence is a lived state.

It is maintained. It is ordered. It is renewed through right relation.

This field does not begin from the assumption that collapse is inevitable. It begins from the recognition that collapse follows when relation is broken, structure is neglected, memory is abandoned, and agreements are no longer kept.

When coherence is maintained, it resolves into right relation, clear distinction, valid passage, ordered progression, immutable living memory, recognizable integrity, and non-collapse.

Requirement

This source may be shared as a common reference for participation, collaboration, and review across the c3 field.

It is intended to support clear expectations, accountable relation, and durable continuity wherever coherence must be maintained across people, systems, and institutions.

THE 7 CONSTRAINTS

Cross-actor invariants that must remain true across the c3 Field.

1	Codex Authority Codex is the authority surface. No c3 actor originates truth outside Codex when acting within the field.
2	Field Relation Nothing stands meaningfully in isolation. Relation must resolve through Field.
3	Measures Registration Behavior in operation must be registered through Measures. If it is not registered, it does not exist in operation.
4	Role Integrity No actor exceeds role. No role collapses into another. Operator remains a bounded responsibility of a Named Individual.
5	Verification Before Recognition Nothing is accepted as valid without verification. Recognition follows verification.
6	Native Distinction Source, structure, registry, execution, actor, system, visibility, and permission do not collapse into one another.
7	Coherence Must Be Maintained Coherence is a lived state. It is maintained, ordered, renewed, and proven in practice.

THE 7 AGREEMENTS

Lived commitments by which c3 actors remain in right relation to the constraints.

- 1

We agree to begin from source.

We return to what is seated and verifiable before binding action, naming, or structure.
- 2

We agree to remain in right relation.

We act with awareness that relation shapes consequence, and coherence is held across the field.
- 3

We agree to remain within role.

No actor substitutes for system, authority, or another role.
- 4

We agree to confirm before we harden.

We do not force drift into permanence.
- 5

We agree to preserve native distinction.

We do not collapse where, what, material, role, route, and authority.
- 6

We agree to correct the active seam before expanding.

When drift appears, we resolve it before building further.
- 7

We agree to maintain coherence as a lived responsibility.

Coherence must be practiced, checked, renewed, and kept under pressure.

THE 7 RESOLUTIONS OF COHERENCE

What becomes visible when coherence is maintained.

- 1

Right Relation
Nothing stands meaningfully alone. Coherence restores relation between self, system, structure, and source.
- 2

Clear Distinction
What is source remains source. What is structure remains structure. What is role remains role.
- 3

Valid Passage
Movement becomes trustworthy. What proceeds does so through alignment, not force, drift, or bypass.
- 4

Ordered Progression
Sequence regains meaning. What comes next is revealed in right order.
- 5

Immutable Living Memory
What is true remains living, traceable, and present without collapsing into drift, erasure, or dead record.
- 6

Recognizable Integrity
Integrity is not claimed. It is recognized in what holds under pressure.
- 7

Non-Collapse
Collapse is not treated here as destiny. Where coherence is maintained, structure does not have to fracture to move.

CLOSING

Constraints define what must remain true. Agreements define how those truths are lived. Resolutions show what coherence becomes when it is maintained.

Codex holds.

Field structures.

Measures registers.

Chazz executes.

NotChazz preserves boundary integrity.
